1- INTRODUCTION

Customizing the Photobooth is simple, you only have to follow the steps that we show in this manual and you will be able to customize:

- **Decals:** You can customize with decals all over the outside of the PhotoBooth.
- **Print Photo:** Can include custom frames, collage with custom backgrounds, logo and lateral text.
- **Monitor:** Can display a Welcome and Bye screen, custom shots with photos or advertising, and a promotional pop up with seasonal designs or special themes.
- **Seasons:** Can created custom seasons for your PhotoBooth
- **The LED VideoWall (Outside):** Can display photos, advertising videos, motion graphics, and customized videos.
- **The Cloud:** Allows you to fully customize an event where photos taken will be uploaded to save or share them on social networks. The Cloud can be customized with a background, a banner that links to the website you want, and the editable title of the event.

3.4 FRAMES

⚠ Stop working from Britta v4 on.

Frames are designs that appear overprinted in photos. They can be customized with any motif, even adding the company logo.
These frames can be thematic, according to the different holidays or events that are attended.

See an example below.

SAMPLE

PHOTO

CUSTOM FRAME

PRINT PHOTO

Frames Technical Details:

Name: To name the different custom frames you must assemble them in groups of 4, as follows:
- Group1:1a, 1b, 1c, 1d
- Group2: 2a, 2b, 2c, 2d
- ...

Size: width: 1280 pixels
height: 960 pixels
Resolution: 300dpi
Extension: PNG
color mode: RGB

It's very important to save the file of the frames only in PNG extension.

Create your own customized frame. Inside of the blank area is where the camera will capture the image, and your customized frame will surround the image.

STRUCTURE

STRUCTURE

We must save the image as shown above. If no image is stored not appear during the game on the top screen. You can not turn on and off using the Setup menu.

5-CUSTOMIZE THE SEASONS

⚠ Works from Britta v4 and up.

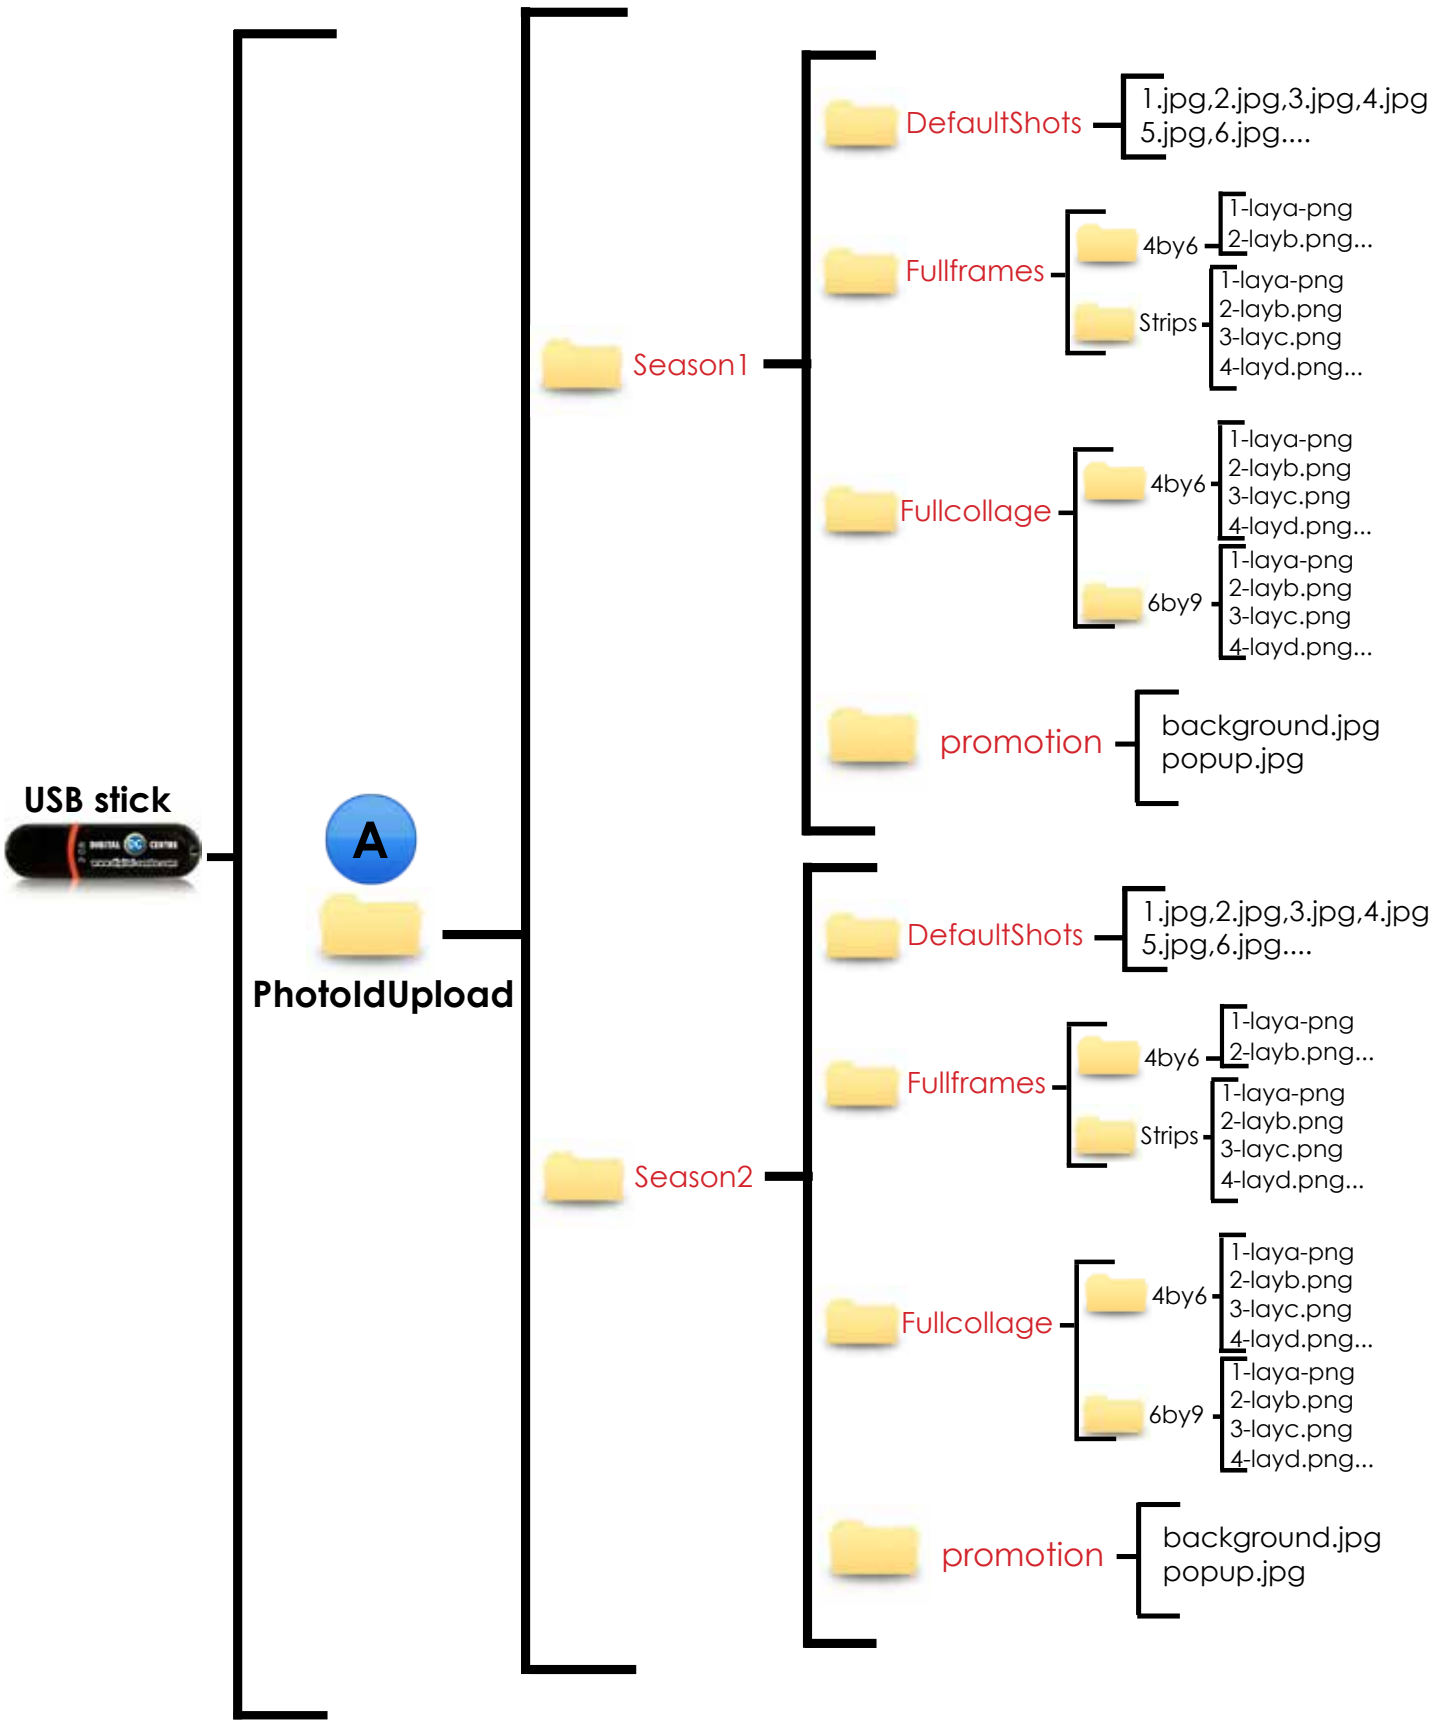
Britta software has 6 seasons by default:
- Valentine's Day
- 4th of July
- Summer
- Halloween
- Winter
- Christmas

The software has by default seasonal graphics, default shots, frames, collages... that will be able to use during the deliminated dates of this seasons.
From Britta v4 and up, the software will have the option to create two custom seasons, each owner will be able to create the seasons of each location and create all the graphics for the season.

Some season samples:
- Thanksgiving
- Sant Patrick's Day
- Mardi Gras
- Oktoberfest
- ...

For each season owners will be able to customize:
- default shots
- full Frames
- full Collages
- promotion

5.1 STRUCTURE



5.2 DEFAULT SHOTS

Default shots are images (pre-made) that are displayed on the screen when nobody is playing.

SAMPLE

Default shots Technical Details:

Name: 1,2,3,4,...
Size: width: 1024 pixels
height: 768 pixels
Resolution: 72dpi
Extension: JPG
Color mode: RGB

STRUCTURE

SeasonX, where X must be number 1 or 2

The names of the images must be: 1.jpg,2.jpg,3.jpg...

5.3 FULLFRAMES

The FullFrames for seasons are the same as the custom ones. They has the same technical details, the same templates must be used.
The only thing that change with the fullframes explained on section *3.5 FullFrames (page 17)* is the USB stick structure. For custom seasons the full frames must be places in another folder; please check below the structure for seasonal frullframes

This video is divided in two parts:
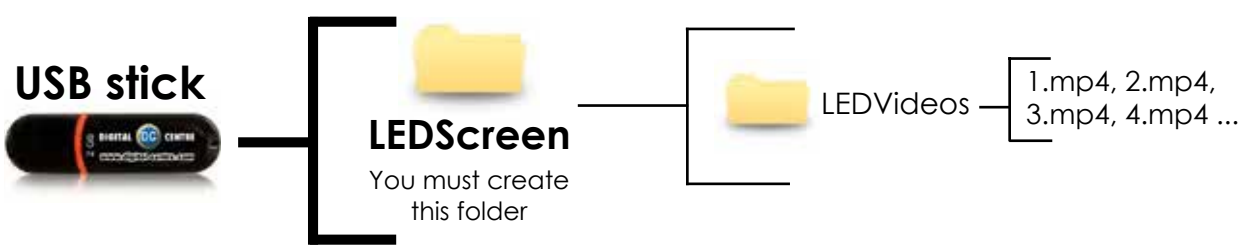
- The 1 (red color): must be rotated upwards, the size is 192x608 px.
- The 2 (blue color): normal position, the size is 192x608 px.

STRUCTURE



6.2.5 CUBE

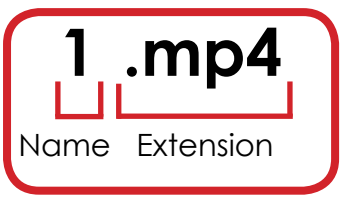
SAMPLE

LEDvideos Technical Details:

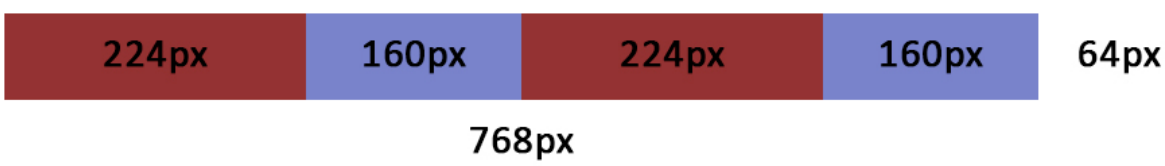
Name: 1,2,3,...
Size: width: 768 pixels
height: 64 pixels
Extension: MP4

It's very important to save the file only in MP4 extension.

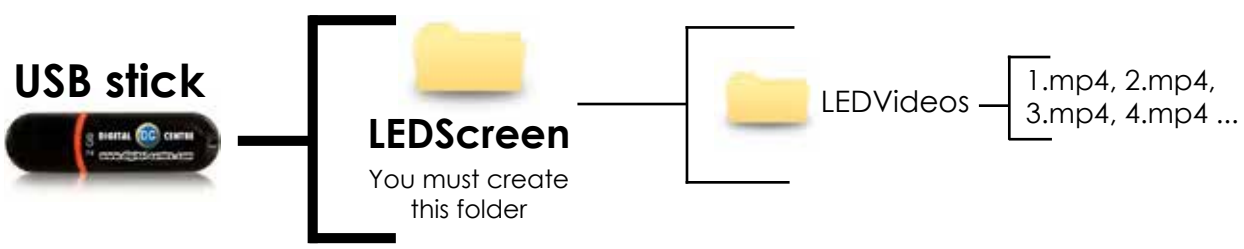
If you send a video that does not have the measures listed above, it will not be displayed in full screen.



The video is for the full LEDScreen, that is shown in the four sides of the PhotoBooth, please check the size of each side, just in case you want to show something different in each side.



STRUCTURE



6.3 LED CUSTOM SHOTS

The LED Custom Shots are images (pre-made) that are displayed on the large outdoor LED screen during the event. For example a company that wants to promote its brand or its products with images or else decides to cede the advertising space to other brands.

See an example below.

SAMPLE

LEDcustomshots Technical Details:

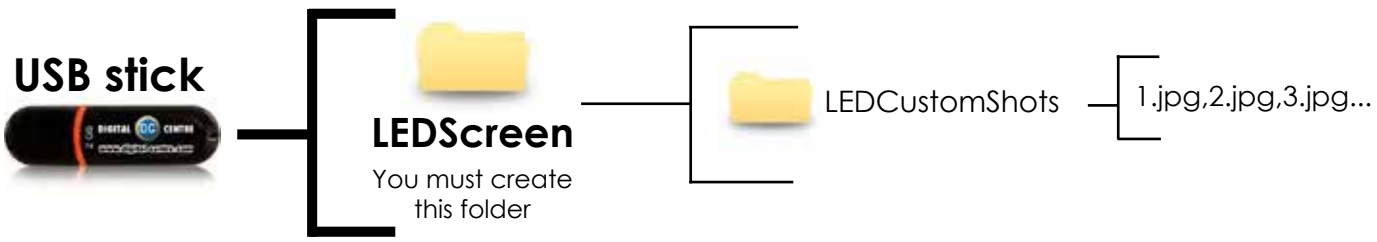
Name: 1,2,3...
Size: width: 1024 pixels
height: 768 pixels
Resolution: 72dpi
Extension: JPG
Color mode: RGB

It's very important to save the file of the LEDCustomShot only in JPG extension.

The imatges will be randomly displayed.

1 .jpg
Name Extension

STRUCTURE



The names of the images must be: 1.jpg,2.jpg,3.jpg...

7-CUSTOMIZE THE CLOUD

The Cloud is a virtual space where all photos and videos are saved during an event.
In this space the users can view all captured material during the event and they can share via email and social networks (Facebook and Twitter), as well as having the ability to download digital files on any device.
This space allows:

- Put a **background** with a color and personal design.
- Place a **banner** (with a message of thanks or photos) to link to any website you wish.
- Edit a **title** and date for the event.
- With **email design** you can type the text you want to appear in the E-mail when your costumers send their photos via E-mail.

7.1 BACKGROUND

The background of the event may include a pattern with a logo that identifies the event.
We recommend watermarks or soft designs that let you see the elements of the page.

See an example below.

SAMPLE

Background Technical Details:

Name: Background
Size: width: 1400 pixels
height: 1150 pixels
Resolution: 72dpi
Extension: JPG
Color mode: RGB

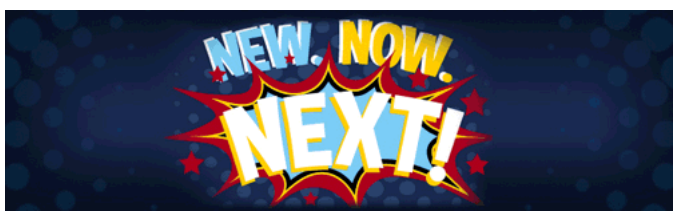
It's very important to save the file of the Background only in JPG extension.

Background .jpg
Name Extension

7.2 BANNER

The banner is a very attractive tool that serves to promote your business. This advertising banner is animated and interactive. It allows you to link to the website that you decide.
All users who access the event to share the photos by social networks or download them on their computer will be able to see the customized banner. You can also change the destination URL by clicking the banner.
See an example below.

SAMPLE



Banner .GIF
Name Extension

Banner Technical Details:

Name: Banner
Size: width: 500 pixels
height: 150 pixels
Resolution: 72dpi
Extension: GIF
Color mode: RGB

It's very important to save the file of the Banner only in GIF extension.

7.3 TITLE

The event title is fully customizable to describe this event.

See an example below.

SAMPLE

7.4 EMAIL DESIGN

You can customize the email with the information that you think most appropriate.
Reading QR photo taken at DC PhotoBooth, you can share in networks or by email.
You can customize the information of the email that you receive with the photo taken in a DC PhotoBooth.

See an example below.

It allows to customize patron's E- Mails when they share their photos through an E-Mail.
